

Plans for Singapore's food bowl

BY THE NUMBERS

Ensuring food security

Singapore currently imports more than **90%** of its food supply

By 2030,

30%

of nutritional needs will be met with locally produced food – up from less than 10% today

Optimising land use

About **1%** of land is set aside for agriculture use

Average vegetable farm

Occupies **2ha** of land

Produces **130 tonnes/ha per year**

High-tech vegetable farm

Occupies less than **1ha** of land

Has potential to produce over **1,000 tonnes/ha per year**
