

**FOR IMMEDIATE RELEASE**

**9 NEW CASES OF LOCALLY TRANSMITTED  
COVID-19 INFECTION**

As of 1 May 2021, 12pm, the Ministry of Health (MOH) has confirmed and verified that there are 9 new cases of locally transmitted COVID-19 infection. Of these, 7 are in the community, and 2 reside in a dormitory. There are 25 imported cases, who had already been placed on Stay-Home Notice (SHN) or isolated upon arrival in Singapore. Amongst the new cases today, 26 are asymptomatic, and were detected from our proactive screening and surveillance, while 8 were symptomatic.

**Summary of new cases**

	Number of cases	Breakdown by		Breakdown by	
		Already in quarantine/ isolation before detection	Detected from surveillance	Symptomatic	Asymptomatic
Cases in the community	7	2	5	5	2
Cases residing in dormitories	2	0	2	0	2
Imported cases	25	25	0	3	22
<b>Total</b>	<b>34</b>				

2. Overall, the number of new cases in the community has increased from 11 cases in the week before to 37 cases in the past week. The number of unlinked cases in the community has also increased from 4 cases in the week before to 10 cases in the past week. We will continue to closely monitor these numbers, as well as the cases detected through our surveillance programme.

3. Amongst the 213 confirmed cases reported from 25 April to 1 May, 78 cases have tested positive for their serology tests, 101 have tested negative, and 34 serology test results are pending.

**Case Details**

**a) Cases in the community: 7**

There are 7 cases in the community today, of whom 3 are linked to previous cases and 4 are currently unlinked.

#### Case 62685

Case 62685 is a 19 year-old female Singapore Permanent Resident who is a student at Singapore Management University (SMU). She has been attending classes virtually, except for a physical visit to SMU on 21 April.

She arrived from India on 28 December 2020, and served SHN at a dedicated facility. While she was serving SHN, she had been identified as a close contact of Case 58784 during their flight to Singapore, and was placed on quarantine from 29 December to 11 January 2021. Her test taken on 8 January during quarantine was negative for COVID-19.

She is asymptomatic, and was detected when she took a COVID-19 pre-departure test on 28 April in preparation for a trip. Her test result came back positive the next day, and she was conveyed to Changi General Hospital in an ambulance. Her Ct value was very high, which is indicative of a low viral load, and her serology test result has come back positive. She could be shedding minute fragments of the virus RNA from a past infection which are no longer transmissible and infective to others, but given that we are not able to definitively conclude when she had been infected, we will take all the necessary public health actions as a precautionary measure.

#### Case 62686

Case 62686 is a 22 year-old female Malaysia national who works as a spa therapist at Spa 9 (41 Holland Drive).

She developed a runny nose on 28 April and sought medical treatment at a General Practitioner clinic, where she was tested for COVID-19. Her test result came back positive the next day. Her serological test result has come back negative, indicating that this is likely a current infection.

#### Case 62688

Case 62688 is a 50 year-old female Singapore Permanent Resident who works as a manager at DIC Asia Pacific Pte Ltd (78 Shenton Way) but had only gone to work on 26 April and 27 April in the past month.

She had been in Japan from 13 March to 9 April, and served SHN upon her return to Singapore at a dedicated facility until 23 April. Her test taken on 22 April during SHN was negative for COVID-19.

She developed body aches on 27 April and a fever the next day, and sought medical treatment at a General Practitioner clinic on 29 April, where she was tested for COVID-19. Her test result came back positive the next day, and she was conveyed to the National Centre for Infectious Diseases (NCID) in an ambulance. Her serological test result has come back negative, indicating that this is likely a

current infection.

#### Case 62690

Case 62690 is a 15 year-old female Singaporean who is a student at Edgefield Secondary School (36 Punggol Field), and was last in school on 29 April.

She developed a sore throat on 28 April, and subsequently a runny nose and anosmia the next day. She reported sick while she was in school on 29 April, and sought medical treatment at a General Practitioner clinic, where she was tested for COVID-19. Her test result came back positive the next day, and she was conveyed to the National University Hospital in an ambulance. Her serological test result is pending.

#### **Case 62541<sup>1</sup> Cluster**

#### Case 62680

Case 62680 is an 86 year-old female Singaporean whose spouse had been warded in Tan Tock Seng Hospital (TTSH) Ward 9D from 20 April to 22 April. She sought medical treatment for an unrelated condition at Khoo Teck Puat Hospital on 30 April, and was found to have a fever. She was tested for COVID-19 and her test result came back positive on the same day. Her serological test result is pending.

#### Case 62687

Case 62687 is a 70 year-old male Singaporean who was admitted to TTSH Ward 9D on 22 April. He tested negative for COVID-19 on 28 April while warded at TTSH as part of our testing of staff and patients who have been in the affected wards. He was transferred to NCID on 28 April. On 30 April, he developed fever and shortness of breath, and was tested again. This time, his test result came back positive for COVID-19 infection. His serology test result has come back negative.

#### Case 62697

Case 62697 is a 74 year-old female Singaporean who had been warded in TTSH Ward 9D from 23 April to 27 April. She was placed on quarantine on 29 April, and tested for COVID-19 on 30 April during quarantine. Her test result came back positive on 1 May and she was conveyed in an ambulance to NCID. Her serological test result is pending.

#### **b) Cases residing in dormitories: 2**

There are 2 cases residing in a dormitory today.

#### Case 62691

---

<sup>1</sup> Case 62541 is a 46 year-old female Philippines national who is a nurse at Tan Tock Seng Hospital (TTSH), and is deployed at Ward 9D. She was confirmed to have COVID-19 infection on 27 April. There are 16 cases in total linked to TTSH so far.

Case 62691, a 35 year-old male Myanmar national, is a Work Permit holder who arrived in Singapore in January 2020. He works as a stevedore at Pasir Panjang Terminal and Brani Terminal. He resides at Pasir Panjang Residence (33 Harbour Drive).

He is asymptomatic, and was detected when he was tested on 28 April as part of Rostered Routine Testing (RRT). His test result came back positive for COVID-19 on the same day. His earlier tests from RRT – the last being on 13 April – were all negative for COVID-19 infection. His serology test result was negative for the N antigen, which suggests the presence of early infection. Case 62691 received his first dose of COVID-19 vaccine on 14 January, and the second dose on 3 February.

#### Case 62684

Case 62684, a 23 year-old male India national, is a Work Permit holder who arrived in Singapore in December 2020. He works as a stevedore at Pasir Panjang Terminal, and resides at Pasir Panjang Residence (33 Harbour Drive).

He is asymptomatic, and was detected when he was tested on 29 April as part of our active case-finding following the detection of Case 62691. His test result came back positive for COVID-19 the next day. His earlier tests from RRT – the last being on 28 April – were all negative for COVID-19 infection. His serology test result was negative for the N antigen, which suggests the presence of early infection. Case 62684 received his first dose of COVID-19 vaccine on 30 January, and the second dose on 22 February.

#### **c) Imported cases: 25**

Amongst the 25 imported cases,

- 5 (Cases 62696, 62698, 62699, 62700 and 62701) are Singaporeans and 4 (Cases 62694, 62703, 62704 and 62705) are Singapore Permanent Residents who returned from Hong Kong, India, Indonesia, the Philippines, UK and US.
- 5 (Cases 62683, 62702, 62708, 62709 and 62710) are Dependant's Pass holders who arrived from India and Nepal.
- 4 (Cases 62693, 62706, 62707 and 62711) are Work Pass holders who arrived from India and Nepal.
- 4 (Cases 62668, 62670, 62672 and 62675) are Work Permit holders who arrived from Indonesia and the Philippines, all of whom are foreign domestic workers.
- 2 (Cases 62682 and 62689) are Short-Term Visit Pass holders who arrived from the Philippines. Case 62682 arrived to visit family members who are Singaporeans, and Case 62689 is here for a work project.
- 1 (Case 62677) is a Special Pass holder who is a sea crew. He arrived from India and had remained onboard until he was conveyed to a hospital.

They had all already been placed on SHN or isolated upon arrival in Singapore and were tested while serving SHN or during isolation.

4. Please refer to the Annexes and MOH's daily Situation Report

([www.moh.gov.sg/covid-19/situation-report](http://www.moh.gov.sg/covid-19/situation-report)) for details.

5. Epidemiological investigations are ongoing. In the meantime, all the identified close contacts of the cases have been isolated and placed on quarantine, and will be tested at the start and end of their quarantine period so that we can detect asymptomatic cases. We will also conduct serological tests for the close contacts to determine if the cases could have been infected by them.

#### **Update on condition of confirmed cases**

6. 14 more cases of COVID-19 infection have been discharged from hospitals or community isolation facilities. In all, 60,765 have fully recovered from the infection and have been discharged from hospitals or community care facilities.

7. There are currently 111 confirmed cases who are still in hospital. Of these, most are stable or improving, and none is in the intensive care unit. 272 are isolated and cared for at community facilities. These are those who have mild symptoms, or are clinically well but still test positive for COVID-19. 31 have passed away from complications due to COVID-19 infection.

8. Case 62573, an 88 year-old female Singaporean, has passed away from complications due to COVID-19 infection on 1 May 2021. She had been warded in TTSH Ward 9D from 14 April, and was confirmed to have COVID-19 infection on 28 April. She had a history of cancer, hypertension, congestive cardiac failure, stroke and hyperlipidaemia. NCID has reached out to her family and is extending assistance to them.

## **Open Clusters**

Epidemiological investigations and contact tracing have uncovered links between cases.

- i. 16 of the confirmed cases (Cases 62541, 62557, 62561, 62567, 62568, 62573, 62574, 62582, 62599, 62615, 62635, 62643, 62648, 62680, 62687 and 62697) are linked to the Case 62541 cluster, with the most recent cases (Cases 62680, 62687 and 62697) linked to the cluster on 30 April. Case 62541 is a 46 year-old female Philippines national who is a nurse at Tan Tock Seng Hospital, and is deployed at Ward 9D, a general ward. She was confirmed to have COVID-19 infection on 27 April. Cases 62557, 62599, 62615 and 62648 were her workplace contacts while Cases 62561, 62567, 62568, 62573, 62574, 62582, 62635, 62643, 62687 and 62697 were patients at the hospital. Case 62680 is a household contact of a patient who had been in an affected ward.
- ii. 5 of the confirmed cases (Cases 61993, 62057, 62063, 62621 and 62622) are linked to the Case 61993 cluster, with the most recent cases (Cases 62621 and 62622) linked to the cluster on 29 April. Case 61993 is a 34 year-old male Indian national who works as a senior research fellow at the National University of Singapore and was confirmed to have COVID-19 infection on 15 April. Case 62057 was his workplace close contact and Cases 62063, 62621 and 62622 were his household contacts.
- iii. 3 of the confirmed cases (Cases 62553, 62629 and 62638) are linked to the Case 62553 cluster, with the most recent cases (Cases 62629 and 62638) linked to the cluster on 29 April. Case 62553 is a 39 year-old female Vietnam national who works as a cleaner deployed at a community care facility at Tuas South. She was confirmed to have COVID-19 infection on 28 April. Case 62638 was her workplace contact, and Case 62629 was a household contact.
- iv. 8 of the confirmed cases (Cases 62517, 62571, 62572, 62576, 62583, 62594, 62595 and 62597) are linked to the Case 62517 cluster, with the most recent cases (Cases 62576, 62594, 62595 and 62597) linked to the cluster on 29 April. Case 62517 is a 38 year-old male Singaporean, who works as an Immigration & Checkpoints Authority officer deployed at Changi Airport Terminal 1. He was confirmed to have COVID-19 infection on 27 April. Cases 62571, 62572, 62576, 62583, 62594, 62595 and 62597 are his family members.
- v. 3 of the confirmed cases (Cases 62049, 62373 and 62524) are linked to the Case 62049 cluster, with the most recent case (Case 62524) linked to the cluster on 27 April. Case 62049 is a 79 year-old India national who arrived from India to visit his family member who is a Singapore Permanent Resident. He was confirmed to have COVID-19 infection on 16 April. Cases 62373 and 62524 are his family members.
- vi. 6 of the confirmed cases (Cases 62113, 62348, 62349, 62350, 62365 and 62485) are linked to the Case 62113 cluster, with the most recent case (Case 62485) linked to the cluster on 26 April. Case 62113 is a 39 year-old Indonesian national who is a sea crew on board a bunker tanker, and was confirmed to have COVID-19 infection on 16 April. Cases 62348, 62349, 62350, 62365 and 62485 were his workplace contacts onboard the ship.
- vii. 4 of the confirmed cases (Cases 61536, 62045, 62143 and 62234) are linked to the Case 62045 cluster, with the most recent case (Case 62234) linked to the cluster on 21 April. Case 62045 is a 41 year-old female Singapore Permanent Resident who works as an

accountant at OM Universal Pte Ltd and was confirmed to have COVID-19 infection on 16 April. Cases 61536, 62143 and 62234 are her household contacts.

- viii. 7 of the confirmed cases are linked to the Case 62181 cluster, of whom 5 are re-infection cases. Case 62181 is a 35 year-old Bangladesh national who resides at Westlite Woodlands Dormitory and works as a construction supervisor at Sembcorp Marine Admiralty Yard. He was confirmed to have COVID-19 infection on 19 April. The other cases are his roommates at the dormitory.
- ix. 4 of the confirmed cases (Cases 61360, 61461, 61470 and 61917) are linked to the Case 61360 cluster, with the most recent case (Case 61917) linked to the cluster on 13 April. Case 61360 is a 50 year-old male Colombian national who arrived from Papua New Guinea for a work project in Singapore and was confirmed to have COVID-19 infection on 30 March. Cases 61461 and 61470 were identified as his close contacts during their flight to Singapore, and Case 61917 was a workplace close contact of Cases 61461 and 61470.

Note: Public places marked with (\*) were visited by cases linked to the Tan Tock Seng Hospital cluster during their likely infectious period.

Those who had been identified as close contacts of confirmed cases would already have been notified by MOH.

As a precautionary measure, persons who had been at these locations during the specified timings should monitor their health closely for 14 days from their date of visit. They should see a doctor promptly if they develop symptoms of acute respiratory infection (such as cough, sore throat and runny nose), as well as fever and loss of taste or smell, and inform the doctor of their exposure history.

Individuals may access the SafeEntry Location Matching Self-Check service via the TraceTogether App, SingPass Mobile, or at <https://wereyouthere.safeentry.gov.sg> to check whether they were at these locations during the specified timings, based on their own SafeEntry records.

There is no need to avoid places where confirmed cases of COVID-19 have been. The National Environment Agency will engage the management of affected premises to provide guidance on cleaning and disinfection.
