Condition of confirmed cases

5. 129 cases are currently warded in hospital. Most are well and under observation. There are currently 11 cases of serious illness requiring oxygen supplementation, and 3 in critical condition in the intensive care unit (ICU).

6. There is continuing evidence that vaccination helps to prevent serious disease when one gets infected. Over the last 28 days, 23 local cases required oxygen supplementation, were admitted to ICU or passed away. 20 are unvaccinated, 2 are partially vaccinated and 1 is fully vaccinated (patient was already ill before infection).

⁴ Fully vaccinated – more than 14 days after completing vaccination regimen. Partially vaccinated – received 1 dose only of 2-dose vaccine or COVID-19 positive within 14 days of completing vaccination regimen.
