

FOR IMMEDIATE RELEASE

**14 NEW CASES OF LOCALLY TRANSMITTED
COVID-19 INFECTION**

As of 15 June 2021, 12pm, the Ministry of Health (MOH) has confirmed and verified that there are 14 new cases of locally transmitted COVID-19 infection. The cases are in the community, and there are no new cases in the dormitories. Of the 14 cases in the community, 5 are linked to previous cases and have already been placed on quarantine. 9 were detected through surveillance, amongst whom 5 are linked to previous cases and 4 are currently unlinked.¹ There are no imported cases today. Amongst the new cases today, 4 are asymptomatic, and were detected from our proactive screening and surveillance, while 10 were symptomatic.

Summary of new cases

	Number of cases	Breakdown by		Breakdown by	
		Already in quarantine/ isolation before detection	Detected from surveillance	Symptomatic	Asymptomatic
Cases in the community	14	5	9	10	4
Cases residing in dormitories	0	0	0	0	0
Imported cases	0	0	0	0	0
Total	14				

2. Overall, the number of new cases in the community has decreased from 93 cases in the week before to 60 cases in the past week. The number of unlinked cases in the community has increased from 10 cases in the week before to 18 cases in the past week. We will continue to closely monitor these numbers, as well as the cases detected through our surveillance programme.

3. Amongst the 96 confirmed cases reported from 9 June to 15 June, 40 cases have tested positive for their serology tests, 41 have tested negative, and 15 serology test results are pending.

¹ This is updated from the afternoon press release as 1 more case has been linked to previous cases following epidemiological investigations.

Case Details

a) Cases in the community: 14

There are 14 cases in the community today, of whom 10 are linked to previous cases and 4 are currently unlinked.

Currently unlinked cases

Detected through surveillance:

Case 64233 is a 41 year-old female Philippines national who is a foreign domestic worker. She developed a sore throat, cough and anosmia on 14 June and her employer brought her to a regional screening centre (RSC), where she was tested for COVID-19 on the same day. Her antigen rapid test (ART) result was negative for COVID-19 but her polymerase chain reaction (PCR) test result came back positive for COVID-19 infection on 14 June. Her serology test result is negative for the N antigen, which suggests the presence of early infection. Case 64233 received her first dose of COVID-19 vaccine on 21 May. Individuals who are unwell or have medical concerns should consult their primary care doctors, and may be referred for COVID-19 screening at the RSCs. They should not go directly to a RSC for COVID-19 tests unless they are invited as part of our community surveillance testing operations.

Case 64236 is a 36 year-old female Singaporean who is a homemaker, and a family member and household contact of Case 64230. She developed a fever on 8 June, and subsequently loss of taste and smell on 10 June but did not seek medical treatment until 14 June when she visited a General Practitioner (GP) clinic, where she was administered both an ART and PCR test. Both test results came back positive for COVID-19 infection on 14 June. Her serology test result is pending.

Case 64237 is a 30 year-old female Singaporean who works as a sales representative at Imperva Singapore Pte Ltd. She developed a fever and runny nose on 14 June and sought medical treatment at a GP clinic on the same day, where she was administered both an ART and PCR test. Her ART result came back positive on the same day, and her PCR test result came back positive for COVID-19 on 15 June. Her serology test result is pending.

Case 64238 is a 35 year-old male Singaporean who is currently unemployed. He developed a fever on 12 June and sore throat on 13 June. He sought medical treatment at a GP clinic on 14 June, where he was administered both an ART and PCR test. He was immediately isolated when his ART result came back positive for COVID-19 on the same day. His PCR test result came back positive for COVID-19 infection on 15 June. His serology test result is pending.

115 Bukit Merah View Market & Food Centre cluster

Already quarantined:

Case 64223 is a 37 year-old female India national who is a food stall vendor at 115

Bukit Merah View Market & Food Centre. She is a household contact of Case 64225. As she had been identified as a close contact of Case 64132², she was placed on quarantine on 11 June. She is asymptomatic, and was detected when she was tested for COVID-19 on 13 June during quarantine. Her test result came back positive for COVID-19 infection on 14 June. Her serology test result is pending.

Case 64224 is a 77 year-old male Singaporean who works as a food stall vendor at 115 Bukit Merah View Market & Food Centre. As he had been identified as a close contact of Case 64132, he was placed on quarantine on 12 June. He is asymptomatic, and was detected when he was tested for COVID-19 on 13 June during quarantine. His test result came back positive for COVID-19 infection on 14 June. His serology test result is negative for the N antigen, which suggests the presence of early infection. Case 64224 received his first dose of COVID-19 vaccine on 8 April, and the second dose on 29 April.

Case 64225 is a 39 year-old male India national who is a food stall vendor at 115 Bukit Merah View Market & Food Centre. He is a household contact of Case 64223. As he had been identified as a close contact of Case 64132, he was placed on quarantine on 11 June. He is asymptomatic, and was detected when he was tested for COVID-19 on 13 June during quarantine. His test result came back positive for COVID-19 infection on 14 June. His serology test result is pending. Case 64225 received his first dose of COVID-19 vaccine on 5 May, and the second dose on 2 June.

Case 64226 is a 30 year-old male India national who works as a supervisor at Keong Hong Construction Pte Ltd. He is a household contact of Cases 64201³, 64202⁴, 64212⁵ and 64213⁶, and was placed on quarantine on 13 June. On the same day, he developed a fever and runny nose, and was tested for COVID-19 on 13 June during quarantine. His test result came back positive for COVID-19 infection on 14 June. His earlier tests from RRT – the last being on 7 June – were all negative for COVID-19 infection. His serology test result is negative.

Case 64234 is a 33 year-old female Singapore Permanent Resident who is a cleaner employed by SATS Facility Management. She is a family member and household contact of Case 64205⁷, and was placed on quarantine on 13 June. She developed a fever and body aches on 14 June, and was tested for COVID-19 on the same day during quarantine. Her test result came back positive for COVID-19 infection on 15 June. Her serology test result is pending.

² Case 64132 is a 74 year-old male Singaporean who works at a sundry store at 115 Bukit Merah View Market & Food Centre. He was confirmed to have COVID-19 infection on 9 June.

³ Case 64201 is a 29 year-old female India national who is currently unemployed. She was confirmed to have COVID-19 infection on 13 June.

⁴ Case 64202 is a 17 year-old male Singaporean who is a student at ITE College Central. He was confirmed to have COVID-19 infection on 13 June.

⁵ Case 64212 is a 21 year-old female Singaporean who works as an IT engineer at IBM (Changi Business Park Central 1). She was confirmed to have COVID-19 infection on 13 June.

⁶ Case 64213 is a 47 year-old male Singaporean who works as a cooking assistant at 115 Bukit Merah View Market & Food Centre. He was confirmed to have COVID-19 infection on 13 June.

⁷ Case 64205 is a 71 year-old female Singaporean who works as a food stall vendor at 115 Bukit Merah View Market & Food Centre. She was confirmed to have COVID-19 infection on 13 June.

Detected through surveillance:

Case 64229 is an 87 year-old male Singaporean who is a retiree. He frequently visited 115 and 116 Bukit Merah View. He developed a fever on 13 June and sought medical treatment at a polyclinic the next day, where he underwent both an ART and PCR test. Both test results came back positive for COVID-19 infection on the same day. His serology test result is pending.

Case 64231 is a 35 year-old male India national who works as a sales executive at Halnaz Frozen Goods Pte Ltd. He has been working from home since 16 May but occasionally goes to the company's shop at 115 Bukit Merah View Market and Food Centre. He developed a fever on 12 June but did not seek medical attention. On 14 June, he sought medical treatment at Alexandra Hospital, where he was administered both an ART and PCR test. His test results came back positive for COVID-19 infection on the same day. His serology test result is pending.

Case 64232 is a 35 year-old female Singaporean who is a teacher at KidsCampus (Chai Chee). She is a family member of Case 64218⁸ but was not placed on quarantine as Case 64218 had not reported her as a contact. She is asymptomatic, and was detected when she went for a COVID-19 test at a GP clinic on 14 June, where she was administered both an ART and PCR test. Both her test results came back positive for COVID-19 on the same day. Her serology test result is pending.

Case 64239 is a 72 year-old male Singaporean who is a retiree. He developed a cough and sore throat on 13 June and sought medical treatment at a GP clinic on 14 June, where he was administered both an ART and PCR test. His ART result was negative for COVID-19, and he developed a fever on the same day. His PCR test result came back positive for COVID-19 on 15 June. His serology test result is pending. Case 64239 received his first dose of COVID-19 vaccine on 22 May, and the second dose on 12 June.

Other linked cases

Detected through surveillance:

Case 64230 is a 35 year-old male Singaporean who works as a senior executive at NETS. He developed a fever and sore throat on 13 June and sought medical treatment at a General Practitioner (GP) clinic on 14 June, where he was administered both an antigen rapid test (ART) and polymerase chain reaction (PCR) test. Both his ART and PCR test results came back positive for COVID-19 infection on 14 June. His serology test result is pending.

b) Cases residing in dormitories: 0

There are no cases residing in dormitories today.

⁸ Case 64218 is a 42 year-old male Singaporean who works as a hawker at Telok Blangah Drive Food Centre. He was confirmed to have COVID-19 infection on 14 June.

c) Imported cases: 0

There are no imported cases today.

4. Please refer to the Annexes and MOH's daily Situation Report (www.moh.gov.sg/covid-19/situation-report) for details.

5. Epidemiological investigations are in progress. In the meantime, all the identified close contacts of the cases have been isolated and placed on quarantine, and will be tested at the start and end of their quarantine period so that we can detect asymptomatic cases. We will also conduct serological tests for the close contacts to determine if the cases could have been infected by them.

6. MOH has been monitoring existing clusters for any further transmission. As there have been no more cases linked to the Case 63290 and White Sands clusters for the past two incubation periods (i.e. 28 days), the clusters have now been closed.

Extension of closure of 115 Bukit Merah View Market & Food Centre to 26 June

7. MOH is investigating cases of COVID-19 infection amongst individuals who work in or visited 115 Bukit Merah View Market & Food Centre. There are so far 25 cases linked to the cluster. To break the chain of transmission and enable deep cleaning of the premises, 115 Bukit Merah View Market & Food Centre has been closed to all members of the public from 13 June to 15 June 2021. With the detection of more cases amongst the market and food centre staff and their close contacts which suggests that there is ongoing spread with wider transmission, the closure of 115 Bukit Merah View Market & Food Centre will be extended to 26 June 2021 (inclusive).

8. All staff and tenants who have been working at 115 Bukit Merah View Market & Food Centre from 25 May have been placed on quarantine, and are tested during quarantine. In order to disrupt any wider, undetected community transmission, we have commenced special testing operations on 14 June for all staff and tenants who have been working in 116 Bukit Merah View from 25 May. We have also extended free COVID-19 testing to members of the public who had visited the shops at 115 and 116 Bukit Merah View between 25 May and 12 June. The testing operations are in progress.

9. All visitors to 115 and 116 Bukit Merah View between 25 May and 12 June are advised to monitor their health closely, and minimise social interactions as far as possible, for 14 days from their date of visit. They are encouraged to see a doctor immediately if they feel unwell.

Update on condition of confirmed cases

10. 17 more cases of COVID-19 infection have been discharged from hospitals or community isolation facilities. In all, 61,911 have fully recovered from the infection and have been discharged from hospitals or community care facilities.

11. There are currently 137 confirmed cases who are still in hospital. Of these, most are stable or improving, and 2 are in critical condition in the intensive care unit. 233 are isolated and cared for at community facilities. These are those who have mild

symptoms, or are clinically well but still test positive for COVID-19. 34 have passed away from complications due to COVID-19 infection.

15 JUNE 2021

Summary of Local COVID-19 Situation

Figure 1: Number of Community Unlinked and Linked Cases⁹

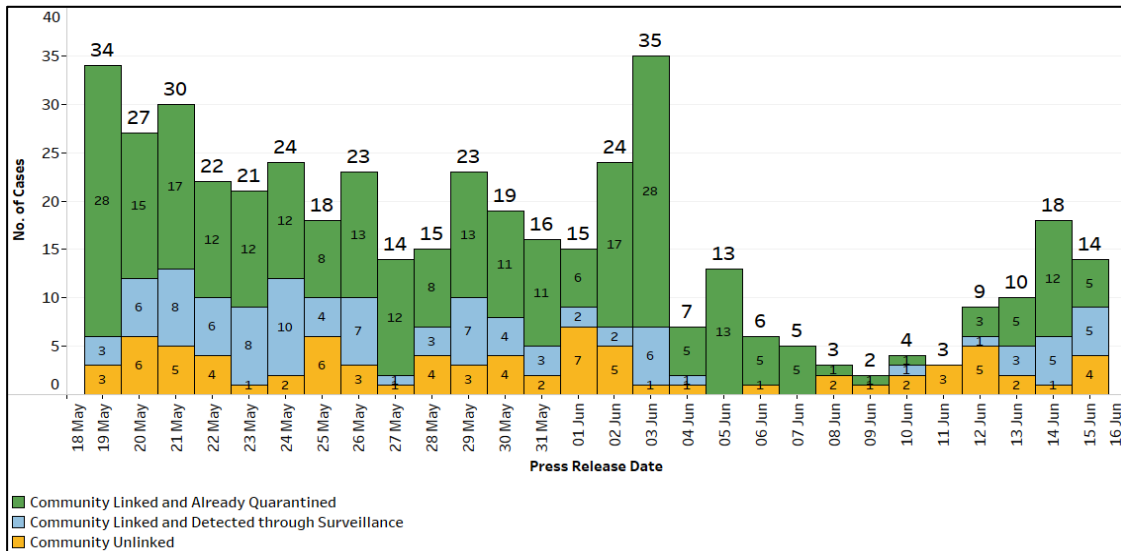

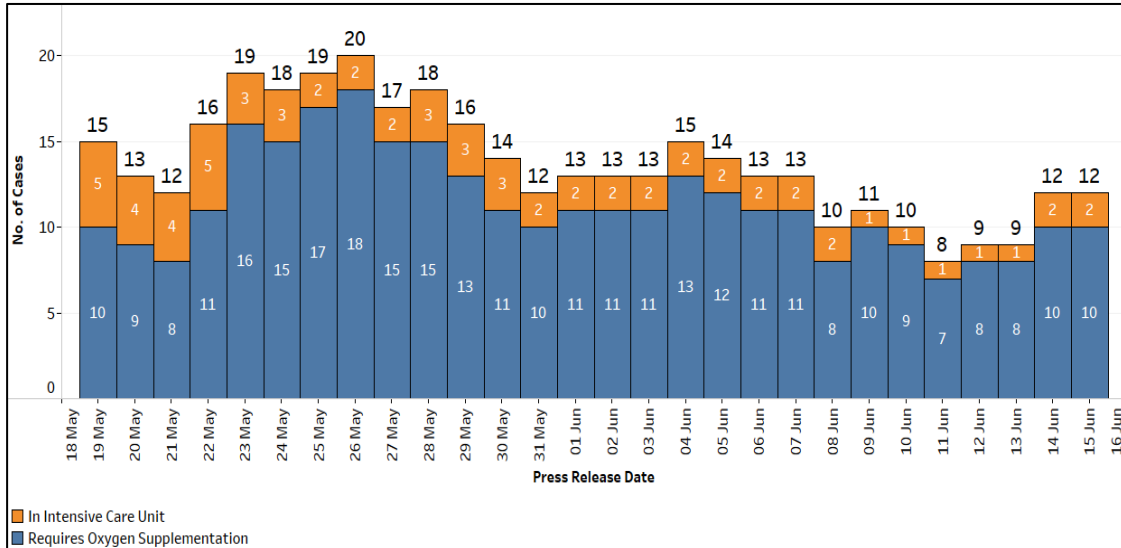

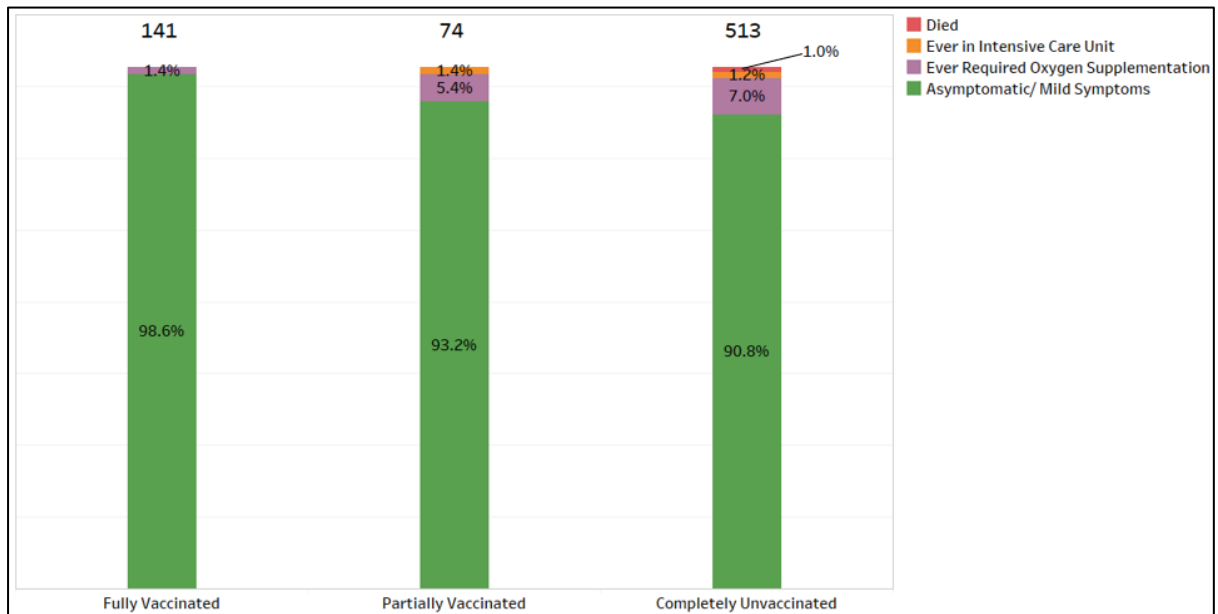

Figure 2: Number of Active Cases in Intensive Care Unit or Requiring Oxygen Supplementation

⁹ Incorporates re-classifications of earlier reported cases.

Figure 3: Breakdown of Local Cases Since 28 April by Vaccination Status and Severity of Condition¹⁰

¹⁰ Fully vaccinated – more than 14 days after completing vaccination regimen. Partially vaccinated – received 1 dose only of 2-dose vaccine or COVID-19 positive within 14 days of completing vaccination regimen.

Open Clusters

Epidemiological investigations and contact tracing have uncovered links between cases.

- i. 25 of the confirmed cases (Cases 64132, 64158, 64187, 64193, 64195, 64196, 64199, 64201, 64202, 64204, 64205, 64212, 64213, 64216, 64218, 64221, 64223, 64224, 64225, 64226, 64229, 64231, 64232, 64234 and 64239) are linked to the 115 Bukit Merah View Market & Food Centre cluster with the most recent cases (Cases 64223, 64224, 64225, 64226, 64229, 64231, 64232 and 64234) linked to the cluster on 14 June, and Case 64239 linked to the cluster on 15 June. Case 64132 is a 74 year-old male Singaporean who works at a sundry store at 115 Bukit Merah View Market & Food Centre. He was confirmed to have COVID-19 infection on 9 June.
- ii. 10 of the confirmed cases (Cases 64184, 64186, 64191, 64197, 64198, 64200, 64206, 64207, 64208 and 64219) are linked to the Case 64184 cluster with the most recent cases (Cases 64197, 64198, 64200, 64206, 64207 and 64208) linked to the cluster on 13 June, and Case 64219 linked to the cluster on 14 June. Case 64184 is a 27 year-old male India national who works as an engineer at Ecoxplore Pte Ltd. He was confirmed to have COVID-19 infection on 12 June.
- iii. 8 of the confirmed cases (Cases 63335, 63354, 63460, 63523, 63579, 63758, 63759 and 63762) are linked to the Pacific Law Corporation cluster with the most recent cases (Cases 63758, 63759 and 63762) linked to the cluster on 26 May. Case 63335 is a 57 year-old female Singaporean who works as an administrative personnel at Pacific Law Corporation. She was confirmed to have COVID-19 infection on 16 May.
- iv. 3 of the confirmed cases (Cases 64149, 64180 and 64181) are linked to the MARINA ARIEL cluster, with the most recent cases (Cases 64180 and 64181) linked to the cluster on 12 June. Case 64149 is a 38 year-old male Indonesia national who is employed by Marina Offshore Pte Ltd as a sea crew on board tugboat MARINA ARIEL. He was confirmed to have COVID-19 infection on 11 June.
- v. 4 of the confirmed cases (Cases 63399, 63900, 63917 and 64182) are linked to the Case 63399 cluster with the most recent case (Case 64182) linked to the cluster on 12 June. Case 63399 is a 35 year-old male Malaysia national who is a kitchen crew at Kota Zheng Zong Bak Kut Teh (Serangoon Gardens). He was confirmed to have COVID-19 infection on 17 May.
- vi. 16 of the confirmed cases (Cases 63160, 63253, 63294, 63300, 63426, 63427, 63428, 63491, 63522, 63526, 63680, 63731, 63751, 63826, 63943 and 64120) are linked to the Changi Prison Complex cluster, with the most recent case (Case 64120) linked to the cluster on 9 June. Case 63160 is a 39 year-old male China national who is employed by SATS Food Services Pte Ltd as a chef at Changi Prison Complex. He was confirmed to have COVID-19 infection on 13 May.
- vii. 13 of the confirmed cases (Cases 63853, 63854, 63874, 63883, 63884, 63885, 63886, 63896, 63903, 63958, 64009, 64076 and 64117) are linked to the NTUC Foodfare (308 Anchorvale Road) cluster with the most recent case (Case 64117) linked to the cluster on 8 June. Case 63853 is a 33 year-old male Malaysia national who works as a kitchen assistant at Hua Zai Eating House Pte Ltd. He was confirmed to have COVID-19 infection on 29 May.

- viii. 33 of the confirmed cases (Cases 63924, 63949, 63950, 63961, 63962, 63974, 63976, 63977, 63979, 63980, 63982, 63983, 63984, 63985, 63986, 63987, 63988, 63989, 63990, 63991, 63992, 63993, 63994, 63995, 63996, 63997, 64001, 64060, 64061, 64062, 64090 64094 and 64108) are linked to the MINDSville@Napiri cluster with the most recent case (Case 64108) linked to the cluster on 7 June. Case 63924 is a 37 year-old female Singaporean who is a resident at MINDSville@Napiri. She was confirmed to have COVID-19 infection on 31 May.
- ix. 8 of the confirmed cases (Cases 63936, 63969, 64046, 64048, 64049, 64057, 64091 and 64093) are linked to the Atacut Singapore cluster, with the most recent cases (Case 64091) linked to the cluster on 6 June, and Case 64093 linked to the cluster on 7 June. Case 63936 is a 26 year-old male Malaysia national who works as a delivery rider for Pizza Hut (Hougang Green). He was confirmed to have COVID-19 infection on 1 June.
- x. 6 of the confirmed cases (Cases 63964, 63981, 64010, 64011, 64059 and 64103) are linked to the Case 63964 cluster with the most recent case (Case 64103) linked to the cluster on 7 June. Case 63964 is a 61 year-old female Singaporean who works at NTUC FairPrice (Clementi Avenue 3). She was confirmed to have COVID-19 infection on 1 June.
- xi. 3 of the confirmed cases (Cases 63931, 64020 and 64077) are linked to the Case 63931 cluster, with the most recent case (Case 64077) linked to the cluster on 5 June. Case 63931 is an 82 year-old male Singaporean who is a retiree. He was confirmed to have COVID-19 infection on 1 June.
- xii. 23 of the confirmed cases (Cases 63534, 63535, 63569, 63603, 63624, 63629, 63668, 63669, 63676, 63682, 63694, 63713, 63717, 63726, 63732, 63791, 63793, 63796, 63834, 63871, 64016, 64056 and 64079) are linked to the McDonald's delivery riders cluster with the most recent case (Case 64079) linked to the cluster on 6 June. Case 63534 is a 27 year-old male Malaysia national who works as a delivery rider for IVIC Logistic Pte Ltd and McDonald's (Bedok Reservoir). He was confirmed to have COVID-19 infection on 20 May.
- xiii. 7 of the confirmed cases (Cases 63721, 63748, 63752, 63933, 64050, 64065 and 64066) are linked to the Tektronix cluster with the most recent cases (Cases 64065 and 64066) linked to the cluster on 5 June. Case 63721 is a 50 year-old male Singaporean who works as an engineer at Tektronix Southeast Asia Pte Ltd. He was confirmed to have COVID-19 infection on 24 May.
- xiv. 7 of the confirmed cases (Cases 63714, 63747, 63794, 63909, 64022, 64052 and 64064) are linked to the Case 63714 cluster with the most recent cases (Case 64052) linked to the cluster on 4 June, and Case 64064 linked to the cluster on 5 June. Case 63714 is a 74 year-old male Singaporean who is a retiree. He was confirmed to have COVID-19 infection on 24 May.
- xv. 5 of the confirmed cases (Cases 63922, 63927, 64024, 64025 and 64047) are linked to the Case 63922 cluster with the most recent case (Case 64047) linked to the cluster on 4 June. Case 63922 is a 56 year-old female Singaporean who is a homemaker. She was confirmed to have COVID-19 infection on 31 May.
- xvi. 3 of the confirmed cases (Cases 63892, 64027 and 64028) are linked to the Case 63892 cluster with the most recent cases (Cases 64027 and 64028) linked to the cluster on 3 June. Case 63892 is a 68 year-old male Singaporean who works as a manager at Phoenix Entertainment Karaoke TV Music Lounge Pte Ltd. He was confirmed to have COVID-19 infection on 30 May.

- xvii. 27 of the confirmed cases (Cases 63507, 63677, 63740, 63760, 63761, 63765, 63798, 63799, 63802, 63830, 63831, 63832, 63836, 63837, 63839, 63842, 63843, 63898, 63905, 63906, 63907, 63929, 63952, 63953, 63970, 64026 and 64032) are linked to the Hong Ye Group cleaners cluster with the most recent cases (Cases 64026 and 64032) linked to the cluster on 3 June. Case 63507 is a 31 year-old male Singaporean who is employed by Hong Ye Group Pte Ltd as a cleaner at Changi Business Park. He was confirmed to have COVID-19 infection on 19 May.
- xviii. 13 of the confirmed cases (Cases 63286, 63292, 63392, 63455, 63456, 63517, 63601, 63609, 63757, 63862, 63863, 63864 and 63999) are linked to the 506 Hougang Avenue 8 cluster with the most recent case (Case 63999) linked to the cluster on 1 June. Case 63286 is a 57 year-old female Malaysia national who is currently unemployed. She was confirmed to have COVID-19 infection on 15 May.
- xix. 3 of the confirmed cases (Cases 63973, 63975 and 63978) are linked to the Case 63973 cluster with the most recent cases (Cases 63975 and 63978) linked to the cluster on 2 June. Case 63973 is an 80 year-old female Singaporean who is a retiree. She was confirmed to have COVID-19 infection on 1 June.
- xx. 7 of the confirmed cases (Cases 63887, 63908, 63920, 63928, 63940, 63947 and 63998) are linked to the Case 63887 cluster with the most recent case (Case 63998) linked to the cluster on 2 June. Case 63887 is a 65 year-old female Singaporean who is a homemaker. She was confirmed to have COVID-19 infection on 30 May.
- xxi. 4 of the confirmed cases (Cases 63941, 63963, 63966 and 64000) are linked to the Case 63941 cluster with the most recent case (Case 64000) linked to the cluster on 2 June. Case 63941 is a 36 year-old female Vietnam national who is a homemaker. She was confirmed to have COVID-19 infection on 1 June.
- xxii. 10 of the confirmed cases (Cases 63806, 63827, 63847, 63848, 63875, 63876, 63951, 63954, 63955 and 63968) are linked to the Case 63806 cluster with the most recent cases (Cases 63951, 63954 and 63955) linked to the cluster on 1 June, and Case 63968 linked to the cluster on 2 June. Case 63806 is a 49 year-old male Singapore Permanent Resident who works as a manager at Success Consultancy Pte Ltd. He was confirmed to have COVID-19 infection on 28 May.
- xxiii. 7 of the confirmed cases (Cases 63725, 63742, 63775, 63777, 63846, 63881 and 63960) are linked to the Chevy's Bar and Bistro cluster with the most recent case (Case 63960) linked to the cluster on 1 June. Case 63725 is a 58 year-old female Singaporean who works at Chevy's Bar and Bistro. She was confirmed to have COVID-19 infection on 25 May.
- xxiv. 3 of the confirmed cases (Cases 63743, 63859 and 63938) are linked to the Case 63743 cluster with the most recent case (Case 63938) linked to the cluster on 1 June. Case 63743 is a 24 year-old male Malaysia national who works at McDonald's (The Woodgrove). He was confirmed to have COVID-19 infection on 26 May.
- xxv. 7 of the confirmed cases (Case 63660, 63661, 63701, 63702, 63703, 63904 and 63923) are linked to Case 63660 cluster with the most recent case (Case 63923) linked to the cluster on 31 May. Those who had been identified as close contacts of confirmed cases would already have been notified by MOH.

As a precautionary measure, persons who had been at these locations during the specified timings should monitor their health closely for 14 days from their date of visit. They should see a doctor promptly if they develop symptoms of acute respiratory infection (such as cough, sore throat and runny nose), as well as fever and loss of taste or smell, and inform the doctor of their exposure history.

Individuals may access the SafeEntry Location Matching Self-Check service via the TraceTogether App or at <https://wereyouthere.safeentry.gov.sg> to check whether they were at these locations during the specified timings, based on their own SafeEntry records.

There is no need to avoid places where confirmed cases of COVID-19 have been. The National Environment Agency will engage the management of affected premises to provide guidance on cleaning and disinfection.
