FOR IMMEDIATE RELEASE

UPDATE ON LOCAL COVID-19 SITUATION

<table>
<thead>
<tr>
<th>Summary of local situation</th>
</tr>
</thead>
<tbody>
<tr>
<td>• 1,251 cases remain warded in hospital. 206 cases require oxygen supplementation in the general ward, 31 are unstable and under close monitoring in the intensive care unit (ICU), and 55 are critically ill and intubated in the ICU. The current overall ICU utilisation rate is 56.8%.</td>
</tr>
<tr>
<td>• Over the last 28 days, of the 70,746 infected individuals, 98.7% had no or mild symptoms, 0.8% required oxygen supplementation in the general ward, 0.2% were in the ICU, and 0.2% has died.</td>
</tr>
<tr>
<td>• As of 24 November 2021, 94% of our eligible population has completed their full regimen/ received two doses of COVID-19 vaccines. Among the total population, 85% has completed their full regimen/ received two doses of COVID-19 vaccines, 86% has received at least one dose, and 24% has received their booster shots.</td>
</tr>
<tr>
<td>• Over the past day, 3,223 cases were discharged, of whom 481 are seniors aged 60 years and above. 1,275 new cases of COVID-19 infection were detected, with 1,228 in the community, 31 in the migrant worker dormitories and 16 imported cases. The weekly infection growth rate is 0.72.</td>

Situation at Hospitals

1. As of 25 November 2021, 206 cases require oxygen supplementation in the general ward, 31 are unstable and under close monitoring in the ICU to prevent further deterioration, and 55 are critically ill and intubated in the ICU. The current overall ICU utilisation rate is 56.8%.

**Figure 1:** Daily Adult ICU Bed Utilisation

COVID ICU beds: beds occupied by all stable < cases including those under monitoring on other oxygen devices

Stable ICU beds: these Stab ICU patients include those with deteriorating conditions requiring critical care, and few post-surgical cases. These proportions vary across hospitals.
Status of Patients

2. Over the last 28 days, 98.7% of local infected cases were asymptomatic or had mild symptoms, 0.8% required oxygen supplementation in the general ward, 0.1% were unstable and under close monitoring in the ICU to prevent further deterioration, and 0.1% had been critically ill and intubated in the ICU.

Figure 2: Local Cases in the Last 28 Days by Severity of Condition

1 Includes only new cases reported in the past 28 days. Based on cases’ worst-ever condition; deceased cases previously in ICU are counted under ‘Deceased’ and not under ‘Ever Critically Ill and Intubated in ICU’.
3. Seniors 60 years old and above, especially if unvaccinated, continue to be more adversely affected by COVID-19:

**Figure 3:** Patients Needing Oxygen Supplementation, ICU Care or Died\(^2\), by Age Groups

\(^2\) May differ from the deaths reported for the day as the latter includes those who have passed on earlier, but whose cause of death was investigated and confirmed only later, e.g. Coroner’s cases.
Vaccination

4. As of 24 November 2021, 94% of our eligible population (aged 12 years and above) has completed their full regimen/ received two doses of COVID-19 vaccines. Among the total population, 85% has completed their full regimen/ received two doses of COVID-19 vaccines, 86% has received at least one dose, and 24% has received their booster shots.

5. Over the past 7 days, the number of fully vaccinated and non-fully vaccinated cases who are critically ill in the ICU are at 0.5 and 4.6 per 100,000 population respectively. Over the same period, the number of fully vaccinated and non-fully vaccinated cases who died are 0.02 and 0.6 per 100,000 population respectively. Among seniors aged 60 and above, the number of fully vaccinated and non-fully vaccinated cases who are critically ill in the ICU are 1.6 and 42.5 respectively. The number of fully vaccinated and non-fully vaccinated seniors who died are 0.1 and 6.1 respectively.

---

3 Non-fully vaccinated comprises persons who are partially vaccinated and completely unvaccinated.
Inflow and Outflow of Cases

6. Over the past day, 3,223 cases were discharged, of whom 481 are seniors aged 60 years and above.

7. As of 25 November 2021, 12pm, the Ministry of Health has detected a total of 1,275 new cases of COVID-19 infection, comprising 1,228 community cases, 31 dormitory resident cases and 16 imported cases. Amongst the community cases today are 167 seniors who are aged 60 years and above. The ratio of community cases for the past week over the week before is 0.72.

8. 3 more cases, aged between 69 and 74 years, have passed away from complications due to COVID-19 infection. All of them had various underlying medical conditions.
